

## **ACR Panel Provides Recommendations For Management Of Incidental Thyroid Nodules.**

[Aunt Minnie](#) (11/10, Ridley) reports that in a white paper published online Nov. 1 in the Journal of the American College of Radiology, the American College of Radiology Incidental Thyroid Findings Committee “provided its consensus recommendations for a practical approach on how to manage incidental thyroid nodules detected on ultrasound, CT, MRI, and nuclear medicine studies.” The guidelines provide “three sets of recommendations – including flow charts – for incidental thyroid nodules found on CT/MRI, nuclear medicine, and extrathyroidal ultrasound, respectively.”
